

```
import java.util.*;
class Main{
    public static void main(String args[]){
        Scanner sc=new Scanner(System.in);
        int r,sum=0,temp;
        System.out.println("Enter no");
        int n=sc.nextInt();

        temp=n;
        while(n>0){
            r=n%10;
            sum=(sum*10)+r;
            n=n/10;
        }
        if(temp==sum)
            System.out.println("palindrome number");
        else
            System.out.println("not palindrome");
    }
}
```
