

```
import java.util.*;
public class Main
{
    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        int t;
        int k,x,res;
        t=sc.nextInt();
        while(t-- > 0){
            k=sc.nextInt();
            x=sc.nextInt();
            res=k-x;
            System.out.println(res);
        }
    }
}
```
