

```
import java.util.*;
public class Main
{
    static Double pi=3.14;
    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        System.out.println("Enter radius of a circle");
        int radius=sc.nextInt();
        Double circle=pi*radius*radius;
        System.out.println(Math.round(circle));
    }
}
```
