

```
import java.util.*;
public class Main
{
    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        int no;
        System.out.println("Enter number ");
        no=sc.nextInt();
        if(no>0)
        {
            System.out.println("positive number");
        }
        else if(no<0)
        {
            System.out.println("Negative number");
        }
        else
        {
            System.out.println("Neither positive nor negative");
        }
    }
}
```
