

```
import java.util.*;
public class Main
{
    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        System.out.println("Enter first string =");
        String str=sc.nextLine();
        System.out.println("Enter second string =");
        String str1=sc.nextLine();
        String res=str.concat(str1);
        System.out.println("Concanated String =" +res);

    }
}
```
