

```
import java.util.*;
class Main {
    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        System.out.println("Enter no");
        int no=sc.nextInt();
        String s=String.valueOf(no);
        String str=s.replace('0','1');
        System.out.println(str);

    }
}
```
