

```
import java.util.*;
public class Main
{
    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        int t=sc.nextInt();
        String s="";
        while(t-- > 0){
            s=sc.next();
            if(s.contains("010") || s.contains("101")){
                System.out.println("Good");
            }else{
                System.out.println("Bad");
            }
        }
    }
}
```
