

```
import java.util.*;
public class Main
{
    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        String name,nmr,nma;
        System.out.println("Enter string");
        name=sc.nextLine();
        System.out.println("Enter String to be removed ");
        nmr=sc.nextLine();
        System.out.println("Enter the new String");
        nma=sc.nextLine();
        String s1=name.replace(nmr,nma);
        System.out.println(s1);
    }
}
```
