```java
import java.util.*;
public class Main
{
 public static void main(String[] args) {
  Scanner sc=new Scanner(System.in);
  String name,res="";
  System.out.println("Enter String");
  name=sc.nextLine();
  int n=name.length();
  for(int i=n-1;i>=0;i--){
     res=res+name.charAt(i);
  }
  if(name.equalsIgnoreCase(res)){
     System.out.println("Pallindrome");
  }
  else{
     System.out.println("Not Pallindrome");
  }
 }
}
```
