```java
import java.util.*;
class Main{
    public static void main(String args[]){
        Scanner sc=new Scanner(System.in);
        System.out.println("Enter no people present in room ");
        int no=sc.nextInt();
        int sum=no*(no-1)/2;
        System.out.println(sum);
    }
}
```
