```java
import java.util.*;
class Main{
    public static void main(String args[]){
        Scanner sc=new Scanner(System.in);
        int no;
        System.out.println("Enter no");
        no=sc.nextInt();
        int add=no<<1;
        System.out.println(add);
    }
}
```
